

Anaphylaxis

Anaphylaxis is a serious and rapid allergic reaction usually involving more than one part of the body.

St Monica's currently has students who can suffer severe allergic reactions (**life-threatening**) through contact with nuts and sesame based foods.

As we endeavour to provide for the different needs of all our students your co-operation is invited to assist the school in supporting and catering for the needs of these particular students, and any future students, by providing your child only with **foods that are nut free.**
